

HIGH LEVEL PRESSURE WASHING SYSTEM

Available on the following models:

- Bronto S 46 XDT
- Bronto S 50 XDT-J
- Bronto S 70 XDT
- Bronto S 90 HLA

- High pressure and pure water compatible cleaning system, available within the full working envelope of the Bronto truck mount range.
- Waterline is mounted inside the boom, so there are no trailing hoses to get caught up.
- We supply a 3m input hose with 3 common fittings to couple up to from your pressure washer / pure water system.
- Customers to supply a pressure washer and water supply or bowser (if required).
- Pressure adjustment in basket available on request.
- 2 Lances available - Short for cleaning alongside or above. Extra Long - 2m length - for cleaning below platform (such as roof cleaning). Quick release couplings in platform, allow quick change from pressure washing to pure water systems (customer to supply brushes)
- Available with standard basket and extending basket.
- Does not reduce SWL.

3 common fittings available:

- 3/8" BSP Male/Female
- 1/2" BSP Male/Female
- Kärcher or Kärcher Female
